Digest

Export Surge Continues (see page 2)--U.S. agricultural exports totaled \$41.1 billion for October 1994-June 1995, 23 percent higher than a year earlier. At the current pace, exports will easily surpass the 1981 record of \$43.8 billion by nearly \$9 billion. Exports gained from very strong global demand for bulk commodities and the continued expansion of high-value product (HVP) exports.

Agricultural Imports Continue at Record Pace (see page 3)--October 1994-June 1995 U.S. agricultural imports were the highest ever, boosted by strong coffee, rubber, and tropical oil unit import price. Advances in live animals, vegetable oils, and vegetables also contributed to increased imports. Few commodities declined. Year-to-date imports were \$22.4 billion, \$2.6 billion higher than this time in fiscal 1994. The European Union (EU), including Sweden, Austria, and Finland, Canada, and Mexico were the largest sources for U.S. agricultural imports. Imports from the EU and Mexico increased in value while those from Canada were unchanged. The \$2.6 billion advance over October-June of the previous year was the largest for the period since 1977.

Notice

FATUS tables A-2 and B-3 are now available over the CALL-ERS/NASS electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229 or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt.

Export Surge Continues

U.S. agricultural exports totaled \$41.1 billion for October 1994-June 1995, 23 percent higher than a year earlier. At the current pace, exports will easily surpass the 1981 record of \$43.8 billion by nearly \$9 billion. Exports gained from very strong global demand for bulk commodities and the continued expansion of high-value product (HVP) exports.

Corn and Cotton Exports Soar

During October-June of fiscal 1995, bulk exports rose 35 percent to 95 million tons, valued at \$18.3 billion. Sharply higher corn shipments accounted for the increase in volume, and corn and cotton accounted for most of the value gain. Corn exports topped 42 million tons, 69 percent higher than last year because of strong global demand for coarse grains and reduced exports from competing exporters. Global corn exports are expected to rise by about 10 million tons to over 66 million tons during fiscal year 1995. The U.S. share of trade will rise to 83 percent as foreign exports fall largely due to greatly reduced exports from China. China's exports are expected to fall from nearly 12 million tons to less than 2 million tons.

U.S. corn shipments were higher to most major markets except for the former Soviet Union. Exports to Asian markets were especially strong. Exports to Korea totaled over 6 million tons compared with 108,000 tons a year ago; shipments to China were nearly 2.2 million tons compared with zero; and exports to Southeast Asia were 850,000 tons compared with 4,000 tons last year. Shipments to Japan rose 30 percent to 1.2 million tons, and rose 20 percent to 4.7 million tons to Taiwan.

Cotton volume increased 44 percent to 1.8 million tons through June; however, higher export prices pushed value to \$3.1 billion, 76 percent higher than last year. Exports to China reached 432,000 tons, 123 percent higher than a year earlier, and value was 136 percent higher at \$725 million. Exports were also significantly higher to Southeast Asia, up 41 percent to 309,000 tons valued at \$526 million. Indonesia and Thailand were the leading markets.

HVP Exports Rise

U.S. HVP exports continued to increase in fiscal 1995, up 18 percent to \$22.8 billion through June. Much of the growth in U.S. HVP exports has usually been in consumer foods such as red meat, poultry meat, fruit, vegetables, and nuts. These exports remain strong in 1995, but in addition, there were large increases in other animal commodities such as animal fats and oils and hides and skins. Animal product exports were 23 percent higher at \$7.8 billion compared with a year earlier.

The value of red meat (beef, pork, and variety meat) exports were 26 percent higher at \$2.9 billion. Beef exports to Japan rose 24 percent to \$1.2 billion; pork gained 44 percent to \$362 million; and variety meats increased 25 percent to \$258 million. The strongest increase was to South Korea where red meat exports jumped 54 percent to \$248 million. U.S. exports to Asian markets were boosted by lower export prices and the declining dollar during the past year. Meat consumption is further boosted by strong economies in the Asian-Pacific Rim region. Mexico's peso devaluation and weakened economy in 1995 sharply curtailed U.S. exports of red meats, which were 19 percent lower than in 1994.

Broiler exports rose 38 percent to \$1.1 billion. The largest gains were to Russia, up 78 percent to \$337 million, and to Hong Kong, up 72 percent to \$267 million. Turkey meat exports were unchanged at \$120 million. Export growth was curtailed because Mexico, the largest market for U.S. turkey meat, lowered purchases 11 percent to \$67 million.

Exports of animal fats and oils jumped 72 percent to \$650 million as high global demand for oils boosted U.S. exports. Volume gained 33 percent to 1.3 million tons. High demand increased export prices nearly 30 percent compared with a year earlier. Hides and skins increased 25 percent to \$1.3 billion on higher cattle hide exports. Cattle hide exports to Hong Kong, South Korea, and Taiwan were 36 percent higher at \$657 million, and exports to China more than doubled to \$52 million. **(Joel Greene, Trade Analysis Branch, 202-219-0816).**

Agricultural Imports Continue at Record Pace

October 1994-June 1995 U.S. agricultural imports were the highest ever, boosted by strong coffee, rubber, and tropical oil unit import price. Advances in live animals, vegetable oils, and vegetables also contributed to increased imports. Few commodities declined. Year-to-date imports were \$22.4 billion, \$2.6 billion higher than this time in fiscal 1994. The European Union (EU), including Sweden, Austria, and Finland, Canada, and Mexico were the largest sources for U.S. agricultural imports. Imports from the EU and Mexico increased in value while those from Canada were unchanged. The \$2.6 billion advance over October-June of the previous year was the largest for the period since 1977.

Noncompetitive Imports Led Growth

Noncompetitive import value gained 49 percent to \$6.5 billion over fiscal 1994's year-to-date value of \$4.3 billion. Although coffee import volume declined slightly during the period, tight supplies and forecasts for reduced harvests boosted coffee prices, driving coffee import value up by \$1.5 billion, accounting for over half the gain in total U.S. import value. Mexico was the largest source for coffee with just over half of U.S. import volume; Brazil and Colombia followed. Banana shipments edged up 6 percent in value, reaching nearly \$850 million. Volume grew 3 percent led by shipments from Ecuador, Costa Rica, and Colombia.

Rubber import value surged as strong demand in industrial nations boosted world rubber prices. Import unit values jumped from \$850 per ton in October-June fiscal 1994 to \$1,480 per ton during the same period this year. Rubber import volume from Indonesia, Thailand, and Malaysia, the major suppliers, was steady. Because of increased rubber, coffee, coconut oil, and cocoa shipments, Southeast Asia was the fastest growing region for year-to-date imports as value surged nearly \$800 million to \$2.6 billion.

Competitive Imports Slightly Higher

Competitive imports reached \$15.9 billion for a gain of \$459 million over October 1994-June 1995. Vegetables and preparations gained 14 percent, reaching \$2.4 billion. Mexico, the EU, and Canada were the top sources by value. Tomatoes, cucumbers, peppers, and onions were

the leading vegetables imported. Fresh fruit imports continued to grow as Mexico and Chile shipped over \$300 million to the United States. Melons, grapes, and strawberries were the top fruits imported from Mexico. Grapes, valued at \$215 million, comprised two-thirds of Chile's shipments. Vegetable oil import value increased due to low world production and high prices for tropical oils as volume remained steady.

Meats, fruit juices, and tobacco were among the few imports that declined in value. Cumulative year-to-date beef imports fell 17 percent to \$1.2 billion and volume was 7 percent lower than October-June last year. The effects of the drought continue to suppress Australian beef exports to the United States, while Canadian shipments fell due to packing plant renovations. At nearly \$500 million, pork imports were 14 percent lower and volume fell 20 percent during the same period. Overall fruit juice imports fell 10 percent to \$487 million as import volume declined 20 percent due to a larger Florida orange crop. Orange juice made up about a third of the total juice volume imported thus far this year and value fell 37 percent on imports of \$156 million. Leaf tobacco imports declined 56 percent to \$314 million on half last year's volume as demand for foreign leaf was stifled by U.S. regulations limiting the foreign tobacco content of U.S.-manufactured cigarettes. Brazil and Turkey were the largest suppliers so far this year. Turkey supplies mostly Oriental-type tobacco leaf, which is extensively used in cigarette production but not grown in the United States.

Imports from Mexico made further gains, as October-June value increased 32 percent to \$3.1 billion. Fresh and frozen vegetables increased the most, with value up \$190 million to \$1 billion, and volume up 220,000 tons to 1.5 million tons. High world coffee prices also boosted Mexico's exports to the United States as coffee import value almost doubled to \$516 million.

October-June imports from the EU totaled \$4.2 billion, nearly \$300 million higher than the same period last year. Wine and beer were the leading commodities by value imported from the EU. Wine shipments increased 6 percent to \$730 million on steady volume. France, Italy, and Spain were the largest EU sources for the United States. Beer and malt beverage shipments were up 11 percent, at \$480 million, with higher volume. The Netherlands was the largest source for beer. Dairy product imports followed wine and beer, totaling

\$446 million for the October-June period, 12 percent over the same period in fiscal 1994. EU vegetable shipments totaled \$380 million. Vegetable products shipped from the EU were generally highly processed types such as olives,

processed tomatoes, prepared artichokes, and vinegar. Spain was the largest source for vegetables from the EU, shipping \$148 million. ***(Tom Capehart, Trade Analysis Branch, 202-219-1262).***

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

Item	October-June		June
